Professional Summary

Forward-thinking professional adept in technology and results-driven, aspiring to capitalize on a diverse skill set with a foundation in information technology and business studies. Proficient in using UI/UX design tools technology to enhance user experience while adapting user first design principle. I am eager to contribute effectively to a dynamic team bringing my ingenuity, technological acumen and devotion to results.

Work History

2024-04 - 2024-07 **UI/UX Design Intern Village Market, Nairobi**

- Conducting comprehensive product and user research to inform and optimize design development.
- Utilizing internal design systems to guide the creation of web and mobile applications.
- Implementing front-end frameworks and markup languages to enhance design flexibility.
- Collaborating closely with back-end developers to ensure seamless integration of design and code, adhering to design guidelines.
- Employing rapid prototyping techniques to meet tight project deadlines effectively.

2022-05 - 2022-08 **Information Technology Intern Tribe Hotels, Nairobi**

- Conducted network administration and configurations, resulting in a notable increase in overall operational efficiency.
- Offered basic end-user troubleshooting and desktop support, contributing to heightened productivity levels across the organization.
- Set up and maintained audio-visual systems, including Logitech, for conference halls, facilitating successful event hosting for over 10 global and local organizations.
- Installed, modified, and repaired software and hardware, resolving technical issues and contributing to increased flow of activities and efficiency throughout the day in the hotel setting.
